

DFID Global School Partnerships

Our professional development programme is being developed and delivered across the UK, in collaboration with the regional Enabling Effective Support (EES) networks and development education providers.

The programme consists of an Introductory course and 4 course modules of which this is one. Teachers can attend some or all of the sessions.

Formal accreditation may be available for teachers who complete the whole GSP Course.

Building Effective Partnerships - North East INSET

This module is designed to support teachers in the UK and in Southern countries who are involved in global school partnerships, to ensure that these partnerships are effective and are based on an equal relationship.

The one-day session will consider:

- the purpose and nature of your global school partnership,
- the impact of economic inequalities on your partnership,
- practical ideas to help maintain and develop an equal relationship.

The session is intended for teachers with experience of learning partnerships, particularly those who have visited their partner school or have hosted visitors.
